

REMEDIAL AND SUMMER INSTRUCTION PROGRAM

Generally

The School Board shall develop and implement programs of prevention, intervention or remediation for students who are educationally at risk, including those who fail to achieve a passing score on any Standard of Learning assessment in grades three through eight, or who fail an end-of-course test required for the award of a verified unit of credit. Such programs shall include components that are research based.

Any student who achieves a passing score on one or more, but not all, of the Standards of Learning assessments for the relevant grade level in grades three through eight may be required to attend a remediation program.

Any student who fails to achieve a passing score on all of the Standards of Learning assessments for the relevant grade level in grades three through eight or who fails an end-of-course test required for the award of a verified unit of credit shall be required to attend a remediation program or to participate in another form of remediation. The superintendent shall require such students to take special programs of prevention, intervention, or remediation, which may include attendance in public summer school programs.

Remediation programs shall include, when applicable, a procedure for early identification of students who are at risk of failing the Standards of Learning assessments in grades three through eight or who fail an end-of-course test required for the award of a verified unit of credit. Such programs may also include summer school for all elementary and middle school grades and for all high school academic courses, as defined by regulations promulgated by the Board of Education, or other forms of remediation. Summer school remediation programs or other forms of remediation shall be chosen by the superintendent to be appropriate to the academic needs of the student.

Students who are required to attend such summer school programs or to participate in another form of remediation shall not be charged tuition.

The requirement for remediation may, however, be satisfied by the student's attendance in a program of prevention, intervention or remediation which has been selected by his parent, in consultation with the Superintendent or designee, and is either (i) conducted by an accredited private school or (ii) a special program which has been determined to be comparable to the required public school remediation program by the division superintendent. The costs of such private school remediation program or other special remediation program shall be borne by the student's parent.

Targeted mathematics remediation and intervention will be provided to students in grades six through eight who show computational deficiencies as demonstrated by their individual performance on any diagnostic test or grade-level Standards of Learning mathematics test that measures non-calculator computational skills.

The School Board shall annually evaluate and modify, as appropriate, the remediation plan based on an analysis of the percentage of students meeting their remediation goals and consideration of the pass rate on the Standards of Learning assessments.

The courses offered and the quality of instruction in summer school programs shall be comparable to that offered during the regular school term. With prior approval of the principal, students may be allowed to enroll in repeat courses to be completed in not less than 70 clock hours of instruction per unit of credit. Students required to attend a division summer school program shall not be charged tuition.

Summer School

The courses offered and the quality of instruction in the summer school program shall be comparable to that offered during the regular school term. Students must meet the requirements for SOL testing if appropriate.

Credit for repeated work will ordinarily be granted on the same basis as that for new work. With prior approval of the principal, however, students may be allowed to enroll in repeat courses to be completed in not less than 70 clock hours of instruction per unit of credit. Students must meet the requirements for SOL testing if appropriate.

Summer school instruction which is provided as part of a remedial program shall be designed to improve specific identified student deficiencies.

Compulsory Attendance

When a student is required to participate in a remediation program pursuant to this policy, the Superintendent may seek immediate compliance with the compulsory school attendance laws if a reasonable effort to seek the student's attendance, including direct notification of the parents of such student of the attendance requirement and failure of the parents to secure the student's attendance, have failed and the superintendent determines that remediation of the student's poor academic performance, passage of the Standards of Learning Assessment in grades three through eight, or promotion is related directly to the student's attendance in the remediation program.
